Boeotia Project,  
Volume III:  
Hyettos  
The origins, florescence  
and afterlife of a  
small Boeotian city

By John Bintliff, Emeri Farinetti  
& Anthony Snodgrass

*With contributions from*

Philip Bes, Yannick Boswinkel, Patrick Degryse, Lieve Donnellan, Machiel Kiel,  
Kristalla Loizou, Anna Meens, Christel Müller, Bart Noordervliet, Kalliope Sarri,  
Apostolos Sarris, Rob Shiel, Vladimir Stissi, Janneke van Zwienen, Athanasios  
Vionis & Keith Wilkinson

On the front cover: *Aerial view of Hyettos (lower right foreground, with its main plain beyond and in the distance the Euboean Gulf and the mountains of Euboea (Darja Grosman).*  
On the back cover: *Drone view of site CN4 (Sta Dendri) with its small chapel far left. Beyond the plain of Hyettos and the Acropolis hill (Lieve Donnellan).*

Cover design by Dora Kemp and Ben Plumridge.  
Typesetting and layout by Ben Plumridge.

Edited for the Institute by Matthew Davies (*Series Editor*).

Printed and bound by Short Run Press, Bittern Rd, Sowton Industrial Estate, Exeter, EX2 7LW, UK.

	Introduction	1
	JOHN BINTLIFF	
<i>Chapter 1</i>	Hyettos: the historical background	5
	ANTHONY SNODGRASS	
<i>Chapter 2</i>	The survey methodology	17
	JOHN BINTLIFF & EMERI FARINETTI	
	The comparative density counts for town and country	21
<i>Chapter 3</i>	The analysis of the Hyettos rural landscape (i): the zoning of the off-site finds	33
	JOHN BINTLIFF & EMERI FARINETTI	
	The dated off-site maps	43
<i>Chapter 4</i>	The analysis of the Hyettos rural landscape (ii): the CN rural sites	61
	JOHN BINTLIFF	
	SITE CN 1	65
	SITE CN 2	76
	SITE CN 3	89
	SITE CN 4	107
	SITE CN 5	123
	SITE CN 6	135
	SITE CN 7	147
	SITE CN 8	161
	SITE CN 9	170
	SITE CN 10	179
	SITE CN 14	187
	SITE CN 11	194
	SITE CN 12	206
	SITE CN 13	212
	SITE CN 15	218
	SITE CN 16	228
	SITE CN 17	230
	Other sites and activity areas	238
	PALAIKASTRO	239
<i>Chapter 5</i>	The city site of Hyettos: analysis of the urban survey ceramics	243
	JOHN BINTLIFF & EMERI FARINETTI	
	Prehistory	243
	Early Iron Age	252
	The Archaic and the Archaic to Classical periods	258
	The Classical to Late Hellenistic eras (c. 500–1 BC)	260
	The Late Hellenistic to Roman (c. 150 BC to AD 200), Early Roman (c. AD 1 to 200), Middle Roman (c. AD 200–400), and the Early to Middle Roman maps (c. AD 1–400)	274
	The Middle Roman–Late Roman (c. 200 to mid-seventh century AD), the Late Roman (c. 400 to mid-seventh century AD) and the Roman–Late Roman maps (c. AD 1 to mid-seventh century AD)	280
	From Byzantine to Modern	285

<i>Chapter 6</i>	Geology, geomorphology, geoarchaeology and land-use potential	293
	ROBERT S. SHIEL & KEITH WILKINSON	
	Background	293
	Geology	293
	Climate	294
	Crops	297
	Methodology	300
	Results	300
	Discussion	301
	Human food production	309
	Conclusions	310
<i>Chapter 7</i>	Soil geochemistry in archaeology, with an evaluation of a long-term programme of trace metal analysis at the ancient cities of Hyettos and Thespiai	313
	JOHN BINTLIFF, PATRICK DEGRYSE & JANNEKE VAN ZWIENEN	
	Review of previous research	313
	The Boeotian Research Programme	315
	Urban research at Hyettos and Thespiai	320
	Results	322
	The regional soil transect	341
<i>Chapter 8</i>	The geophysical survey at Hyettos	345
	APOSTOLOS SARRIS & NIKOS PAPADOPOULOS	
	Methodology	345
	Results	350
	The magnetic survey	350
	The electrical resistance and electromagnetic induction surveys	355
	Concluding remarks	357
<i>Chapter 9</i>	Hyettos: the architectural traces at the urban centre	363
	YANNICK BOSWINKEL & ANTHONY SNODGRASS	
	Architectural traces: mapping – Introduction (Janneke van Zwienen Noordervliet & Bart Noordervliet)	363
	Architectural traces: interpretation	363
	Finds density	363
	Overall density	365
	Types of architectural elements	370
	Architectural elements that are not generic building blocks	370
	Size-based analysis of the building blocks	379
	Materials	383
	Missing materials	384
	Vertical elevations	384
	Conclusions	386
<i>Chapter 10</i>	Glimpses of history: Hyettos and its epigraphic testimonies	387
	CHRISTEL MÜLLER	
	Archaic and Classical times	387
	Hyettos and the Boeotian koinon (335–171 BC): the recruitment lists	388
	Hyettian civic life: Hellenistic political institutions and society	391
	Dedications at Hyettos in the second century BC: in search of the Agora	392
	Imperial inscriptions and the sacred <i>gerusia</i>	393

<i>Chapter 11</i>	Prehistoric Hyettos KALLIOPE SARRI	397
	Character and expansion of prehistoric occupation	397
	Prehistoric finds on the Acropolis	398
	Prehistoric pottery from the Lower Town	398
	The prehistoric off-site material	400
	Prehistoric pottery classes	403
	Character and quality of the prehistoric ceramics	403
	Conclusions	412
<i>Chapter 12</i>	The pottery of the Early Iron Age to the Hellenistic Period VLADIMIR STISSI & ANNA MEENS	413
	The urban survey	415
	The off-site survey	439
	The rural sites survey	451
	General conclusions	479
<i>Chapter 13</i>	Urban and rural Hyettos: Late Hellenistic to Late Roman pottery PHILIP BES	483
	Aims and methods	483
	The ceramic data: quantities and other properties	484
	Local and regional manufacture and circulation	486
	A diachronic discussion of the urban and rural pottery	494
	Case studies	519
	Provenance: local, regional and beyond	527
	A diachronic summary for the urban, off-site and rural site pottery	534
<i>Chapter 14</i>	A household archaeology and history of Hyettos and its territory: the Byzantine to Early Modern pottery ATHANASIOS K. VIONIS, WITH CHRYSALLA LOIZOU	537
	Fragmentation, chronology and terminology	538
	Household assemblage-composition at Hyettos and the CN sites	542
	A historical and archaeological biography of the post-Roman sites	548
	Pottery fabrics, technology and production	564
	The pottery	571
	Summary and concluding remarks	590
<i>Chapter 15</i>	Three settlements in northern Boeotia in the Ottoman and early modern Greek periods, 1460–1879 MACHIEL KIEL	593
	The economic development of Vendre	594
	(Andrea) Lutsi	595
	Pavlo (Muzak)	596
	Economy	596
<i>Chapter 16</i>	Synthesis: the development of the town and countryside of Hyettos from the survey evidence JOHN BINTLIFF	599
	Prehistory	599
	The lithic finds	607
	Proto-history	614
	The Archaic Period	617
	(Archaic-) Classical to Middle Hellenistic (c. 700–150 BC)	618
	Late Hellenistic and Early Roman (c. 150 BC–AD 200)	631
	Middle and Late Roman (c. AD 200–400 and 400–650)	633
	The Byzantine and Frankish era	638
	The Frankish-Early Turkish, Middle to Late Ottoman and Early Modern eras (c. AD 1400–1900)	644

## CONTRIBUTORS

JOHN BINTLIFF was Professor of Classical and Mediterranean Archaeology at Universiteit Leiden, Netherlands, and is now Honorary Professor in the Department of Archaeology, at the University of Edinburgh, UK (johnlbintliff@gmail.com).

EMERI FARINETTI is an Associate Professor at the Università degli Studi Roma Tre, Italy (emerifarinetti@uniroma3.it).

ANTHONY SNODGRASS is Laurence Professor Emeritus of Classical Archaeology of the University of Cambridge, UK (ams1002@cam.ac.uk).

\* \* \* \* \*

PHILIP BES completed his Doctorate at the Katholieke Universiteit Leuven, Belgium. He is currently a research fellow at the University of Vienna, Austria (philipmbes@gmail.com).

YANNICK BOSWINKEL completed his Doctorate at the Universiteit Leiden, Netherlands (yboswinkel@gmail.com).

PATRICK DEGRYSE is Professor of Archaeological Sciences at the Katholieke Universiteit Leuven, Belgium (Patrick.degryse@kuleuven.be).

LIEVE DONNELLAN is Assistant Professor of Classical Archaeology at the University of Melbourne, Australia (lieve.donnellan@unimelb.edu.au).

MACHIEL KIEL was Professor at the Universiteit Utrecht, Netherlands, then Director and later Senior Research Fellow of the Netherlands Institute in Turkey.

CHRYSALLA LOIZOU is a PhD candidate at the Department of History and Archaeology in the University of Cyprus (loizou.chrystalla@gmail.com).

ANNA MEENS took her Doctorate at the University of Amsterdam, Netherlands (anna\_meens@hotmail.com).

CHRISTEL MÜLLER is Professeure de l'Histoire grecque at the Université Paris Ouest Nanterre, France (christel.muller@mae.u-paris10.fr).

BART NOORDERVLIET studied at the Universiteit Leiden, Netherlands, and is now an independent computer consultant (bartnv@gmail.com).

KALLIOPE SARRI is Marie Skłodowska-Curie Fellow at the Saxo Institute, University of Copenhagen, Denmark (kalliope.sarri@gmail.com).

APOSTOLOS SARRIS is Professor of Digital Humanities at the University of Cyprus (sarris.apostolos@ucy.ac.cy).

ROB SHIEL was formerly a Senior Lecturer at Newcastle University, UK (robert.shiel@newcastle.ac.uk).

VLADIMIR STISSI is Professor of Classical Archaeology at the University of Amsterdam, Netherlands (V.V.Stissi@uva.nl).

JANNEKE VAN ZWIENEN studied at the Universiteit Leiden, Netherlands, and is now a local government GIS specialist in urban planning (jannekevz@gmail.com).

ATHANASIOS VIONIS is Assistant Professor in Byzantine Archaeology and Art at the University of Cyprus (vionis@ucy.ac.cy).

KEITH WILKINSON is Professor of Archaeology at the University of Winchester, UK (Keith.Wilkinson@winchester.ac.uk).

---

## Figures

0.1	<i>The cities and rural areas surveyed by the Boeotia Project, 1979–2016.</i>	2
0.2	<i>Seen from the northwest, the Acropolis and Lower Town of Hyettos.</i>	2
0.3	<i>A photograph, looking north, taken during surveying of the Lower Town in the 1989–1992 seasons.</i>	3
0.4	<i>The Hellenistic military enlistment rolls inscribed on the Acropolis walls of Hyettos.</i>	3
0.5	<i>Map of the known archaeological sites in the Hyettos chora.</i>	4
2.1	<i>The survey grid for the city at Hyettos.</i>	18
2.2	<i>The transect grid for the rural survey running northwards from ancient Hyettos.</i>	19
2.3	<i>The lay-out of the rural survey.</i>	20
2.4	<i>The density values in sherds per hectare for the city of Thespiiai and its southern inner hinterland.</i>	21
2.5	<i>An outer density boundary for the inner extramural zone of Thespiiai.</i>	22
2.6	<i>Density values, visibility-corrected, for the urban focus of Thespiiai.</i>	23
2.7	<i>The visibility-corrected densities for the urban survey at Hyettos.</i>	24
2.8	<i>The density values, urban and rural, in sherds per hectare for the city of Hyettos and its northern inner hinterland.</i>	25
2.9	<i>A comparative map of the inner territories of Thespiiai and Hyettos.</i>	27
2.10	<i>Magnetic Susceptibility: location of the sampling lines and control soil samples collected from the city site by the FORTH team.</i>	28
2.11	<i>Soil sample transects conducted by Neil Rimmington in 1994–5.</i>	29
2.12	<i>Diagrammatic representation of the geophysical anomalies with codings.</i>	30
2.13	<i>The geophysical survey of the Lower Town of Hyettos: key structures identified.</i>	31
2.14	<i>The putative city boundary, based on ceramic density values at &gt;22,125 sph.</i>	32
3.1	<i>The rural site collection grids, each surrounded by an initial series of likely haloes, the ‘site boxes’, and by the off-site zones A–F.</i>	34
3.2	<i>The rural survey area, with the finds shown graded into nine levels of density.</i>	35
3.3	<i>The same map as in Figure 3.2, used as a base map with the six off-site zones and the 14 site boxes superimposed.</i>	36
3.4	<i>A map showing the approximate extents of rock types in the rural survey area.</i>	37
3.5	<i>A map of the surface soils in the survey area.</i>	38
3.6	<i>Provisional map of the survey area, with Thiessen polygons set round each rural site.</i>	39
3.7	<i>The rural survey area, with graded soil fertility characteristics superimposed on to the Zonal boundaries.</i>	40
3.8	<i>The rural survey area, with the overall ceramic densities and site grids, the good soils, the rocky and infertile zones, and the areas of stony soil indicated.</i>	42
3.9	<i>Off-site distribution of finds dated to the Neolithic era.</i>	44
3.10	<i>Off-site distribution of finds dated to the Early and Middle Helladic periods.</i>	44
3.11	<i>Off-site distribution of finds dated to the Middle and Late Helladic periods.</i>	45
3.12	<i>Off-site distribution of finds dated to the generic Bronze Age / Prehistoric eras.</i>	45
3.13	<i>Off-site distribution of lithic finds.</i>	46
3.14	<i>Off-site distribution of finds dated to the Early Iron Age.</i>	46
3.15	<i>Off-site distribution of finds dated to the Early Iron Age and adjacent periods.</i>	47
3.16	<i>Off-site distribution of finds dated generically from the Prehistoric to the historical Greek eras.</i>	47
3.17	<i>Off-site distribution of finds dated to the Archaic and Archaic to Classical periods.</i>	48
3.18	<i>Off-site distribution of finds dated to the periods from Archaic to Hellenistic.</i>	48
3.19	<i>The distributions in Figure 3.18, combined with the map of soil types.</i>	49
3.20	<i>Off-site distribution of finds dated to the Hellenistic period.</i>	49
3.21	<i>A comparison of the finds of Hellenistic date with those of the generic Archaic to Hellenistic era.</i>	50
3.22	<i>Generic off-site distribution of finds of all historical Greek periods down to the Middle Hellenistic, combined with the same soil map as in Figure 3.19.</i>	51
3.23	<i>Off-site distribution of finds dated to the Late Hellenistic to Early and Middle Roman periods.</i>	51
3.24	<i>Off-site distribution of finds dated to the Early to Middle Roman periods.</i>	52
3.25	<i>Off-site distribution of finds dated to the Middle and Middle to Late Roman periods.</i>	52
3.26	<i>Off-site distribution of finds dated to the generic Roman to Late Roman era.</i>	53
3.27	<i>Off-site distribution of finds dated to the Late Roman period.</i>	53

3.28	<i>A comparison of the generic Greek and generic Roman distribution maps.</i>	54
3.29	<i>Off-site distribution of finds dated to the Early Byzantine period.</i>	55
3.30	<i>Off-site distribution of finds dated to the Middle Byzantine period.</i>	55
3.31	<i>Off-site distribution of finds dated to the Middle to Late Byzantine periods.</i>	56
3.32	<i>Off-site distribution of finds dated to the Frankish period.</i>	56
3.33	<i>Off-site distribution of finds generically dated to the Medieval era.</i>	57
3.34	<i>Off-site distribution of finds dated to the Frankish / Turkish transition and the Ottoman (Turkish) periods.</i>	57
3.35	<i>Off-site distribution of finds generically dated to the Medieval to Post-Medieval eras.</i>	58
3.36	<i>Off-site distribution of finds dated to the Turkish to Early Modern and Modern eras.</i>	58
3.37	<i>Off-site distribution of finds dated to the Early Modern and Modern eras.</i>	59
4.1	<i>Range of site sizes.</i>	62
4.2	<i>Farmsites from Boeotia and Attika.</i>	63
4.3	<i>CN 1. A drone photo of the site, looking southeast.</i>	66
4.4	<i>CN 1. Igneous soil at the site.</i>	66
4.5	<i>CN 1. Rich volcanic soil adjoining the site.</i>	67
4.6	<i>CN 1. Plain and city, seen looking southwest from CN 1.</i>	67
4.7	<i>CN 1. The numbered site grid, set against a contour map.</i>	68
4.8	<i>CN 1. The site grid set within the numbered fieldwalking transects.</i>	68
4.9	<i>CN 1. The site core as outlined at two levels of density, &gt;4000 and &gt;6500 sherds per ha.</i>	69
4.10	<i>CN 1. The nearby areas of high off-site density, outlined in cream.</i>	69
4.11	<i>CN 1. Histogram showing the representation of dated sherds by period.</i>	71
4.12	<i>CN 1. Distribution of finds dated from the Early Iron Age to the Archaic periods.</i>	71
4.13	<i>CN 1. Distribution of finds dated from the Late Helladic to the Classical / Hellenistic periods.</i>	72
4.14	<i>CN 1. Distribution of finds dated from the Archaic to the Classical periods.</i>	72
4.15	<i>CN 1. Distribution of finds dated from the Archaic to Hellenistic periods.</i>	73
4.16	<i>CN 1. Distribution of finds dated to the Classical / Hellenistic period.</i>	73
4.17	<i>CN 1. Distribution of finds dated to the Hellenistic period.</i>	74
4.18	<i>CN 1. Distribution of finds dated to sub-periods within the Hellenistic / Roman era.</i>	74
4.19	<i>CN 1. Distribution of finds dated broadly within the Hellenistic / Roman era.</i>	75
4.20	<i>CN 1. Distribution of finds dated to the Mid / Late Roman periods.</i>	75
4.21	<i>CN 2. A drone photo of the site, seen from the southeast.</i>	77
4.22	<i>CN 2. The northern environs of the site.</i>	78
4.23	<i>CN 2. The main plain, with the city of Hyettos beyond, seen from the east.</i>	78
4.24	<i>CN 2. The main plain, looking south, with the vineyard in middle distance.</i>	79
4.25	<i>CN 2. The off-site densities, with higher counts indicated by darker shading, over the site area.</i>	79
4.26	<i>CN 2. The numbered site plan, set against a contour map.</i>	80
4.27	<i>CN 2. The nearby areas of high off-site density (over 3000 sph) outlined in cream.</i>	80
4.28	<i>CN 2. The site core as outlined at three levels of density, &gt;3500, &gt;6000 and &gt;9000 sherds per ha.</i>	81
4.29	<i>CN 2. Histogram showing the representation of dated sherds by period.</i>	82
4.30	<i>CN 2. Distribution of finds assigned to various potentially protohistorical dates.</i>	83
4.31	<i>CN 2. Distribution of finds of potentially pre-Classical date</i>	83
4.32	<i>CN 2. Distribution of finds dated to the Archaic and Archaic/Classical periods.</i>	84
4.33	<i>CN 2. Distribution of finds dated to the Archaic to Classical to Hellenistic periods.</i>	84
4.34	<i>CN 2. Distribution of finds dated to the Hellenistic period.</i>	85
4.35	<i>CN 2. Distribution of finds dated to the Roman – Late Roman era.</i>	85
4.36	<i>CN 2. Distribution of finds assigned to various sub-periods within the range ‘Late Hellenistic / Roman’.</i>	86
4.37	<i>CN 2. Distribution of finds of Middle to Late Roman date.</i>	86
4.38	<i>CN 2. Distribution of finds clearly assigned to the Late Roman period.</i>	87
4.39	<i>CN 2. Distribution of finds of Medieval to Modern date.</i>	87
4.40	<i>CN 3. A drone view of the site, taken from the southwest.</i>	90
4.41	<i>CN 3. The Church of Agios Georgios, seen from the north.</i>	91
4.42	<i>CN 3. Brown, soft limestone soil in the site vicinity.</i>	91
4.43	<i>CN 3. Standing water on the site, in summer.</i>	92
4.44	<i>CN 3. Rich mudstone soils to the north of the site.</i>	92

4.45	CN 3. Red limestone soils on a peneplain, south of the site and north of the city.	93
4.46	CN 3. The numbered site plan set against a contour map, with the two adjoining churches indicated.	94
4.47	CN 3. The nearby off-site fieldwalking transects, with higher density values over 4500 outlined in cream.	94
4.48	CN 3. Site plan, with grid units of densities over 6444 outlined.	95
4.49	CN 3. Histogram showing the representation of dated sherds by period.	95
4.50	CN 3. Distribution of finds dated to the Neolithic and Bronze Ages.	98
4.51	CN 3. Distribution of finds potentially or certainly dated to the EIA, Geometric or Archaic periods.	98
4.52	CN 3. Distribution of finds dated to the EIA or the ensuing historical periods.	99
4.53	CN 3. Distribution of finds dated to the Archaic / Hellenistic, Classical / Hellenistic and Classical periods.	99
4.54	CN 3. Distribution of finds of the Hellenistic period.	100
4.55	CN 3. Distribution of finds dated to the phases R-LR, MR-LR and LR.	100
4.56	CN 3. Distribution of finds dated to the sub-phases within 'Hellenistic to Roman'.	101
4.57	CN 3. Distribution of finds dated to the Early Byzantine and adjacent periods.	101
4.58	CN 3. Distribution of finds dated to the Middle Byzantine period.	102
4.59	CN 3. Distribution of finds dated to the Frankish period.	102
4.60	CN 3. Distribution of finds dated to the Middle to Late Byzantine periods.	103
4.61	CN 3. Distribution of finds dated to the generic Medieval period.	103
4.62	CN 3. Distribution of finds assigned to the Frankish/Turkish, Ottoman, Medieval, Post-Medieval, Early Modern and Modern periods.	104
4.63	CN 4. A distant view from the Acropolis of Hyettos.	108
4.64	CN 4. The hard limestone soil cover with maquis behind, seen a little to the north of the site.	108
4.65	CN 4. The site with its chapel, together with a lower plateau which includes Site CN 7.	109
4.66	CN 4. Plan of the visible ruined walls on the site.	110
4.67	CN 4. A vertical drone view of part of the site, with the chapel visible at the bottom.	111
4.68	CN 4. View of the ruins of House D (= Sigalos 4).	111
4.69	CN 4. View of the ruins of House D (= Sigalos 4).	112
4.70	CN 4. View of the ruins of House D (= Sigalos 4).	112
4.71	CN 4. House D.	113
4.72	CN 4. Traces of House E (= Sigalos 5).	113
4.73	CN 4. View of the walls and central spine of Building F (= Sigalos 6).	114
4.74	CN 4. View of the walls and central spine of Building F (= Sigalos 6).	114
4.75	CN 4. View of the walls and central spine of Building F (= Sigalos 6).	115
4.76	CN 4. View of the ruins of House G (= Sigalos 3).	115
4.77	CN 4. View of the ruins of House G (= Sigalos 3).	116
4.78	CN 4. View of the ruins of House B (= Sigalos 1).	116
4.79	CN 4. View of the ruins of House B (= Sigalos 1).	117
4.80	CN 4. View of the possible tower structure at the southern end of House B.	117
4.81	CN 4. View of the threshing floors to the northwest of the site.	118
4.82	CN 4. View of the threshing floors to the northwest of the site.	118
4.83	CN 4. The numbered site grid, set against a contour map showing the hill-top location.	119
4.84	CN 4. The nearby areas of high off-site density, outlined in cream.	119
4.85	CN 4. The site core, as outlined at three levels of density, >2000, >6500 and >18,000 sherds per ha.	120
4.86	CN 4. Histogram showing the representation of dated sherds by period.	120
4.87	CN 4. Distribution of sherds dated to the Frankish and earlier Ottoman periods.	121
4.88	CN 4. Distribution of sherds dated to the Ottoman and Early Modern periods.	121
4.89	CN 4. Distribution of sherds dated to the Early Modern to Modern periods.	122
4.90	CN 5. A drone view, from the west, of the site on its slope and plateau.	124
4.91	CN 5. The soft flysch covering the site area.	125
4.92	CN 5. A contrast between flysch and igneous rock near the site.	125
4.93	CN 5. View from the west, looking along the fertile limestone plateau to the hillslope site.	126
4.94	CN 5. The site grid, set on a contour map.	127
4.95	CN 5. The nearby areas of high off-site density (over 1000 sherds per ha), outlined in cream.	127
4.96	CN 5. The site core, as outlined at three levels of density, >2500, 5200–6500 and over, and >10,000 sherds per ha.	128

4.97	CN 5. Histogram showing the representation of dated sherds by period.	128
4.98	CN 5. Distribution of sherds dated to the Prehistoric eras.	130
4.99	CN 5. Distribution of finds dated to Archaic / Hellenistic and Classical / Hellenistic.	130
4.100	CN 5. The broader spectrum of off-site finds dated to the Archaic and Archaic / Classical periods.	131
4.101	CN 5. The broader spectrum of off-site finds dated to the 'Archaic to Hellenistic' era.	131
4.102	CN 5. A drone view from the south, showing fertile terrain to the west of both Site CN 6 and CN 5.	132
4.103	CN 5. Distribution of finds dated to the Roman to Late Roman periods.	132
4.104	CN 5. Distribution of finds dated to the Late Roman and (possibly) Early Byzantine periods.	133
4.105	CN 5. Distribution of finds dated within to the Late Hellenistic / Roman transitional phase as well as to the wider generic Hellenistic and Roman phases.	133
4.106	CN 5. Distribution of finds dated to the sub-phases of Imperial Roman.	134
4.107	CN 6. Igneous soil near the site.	136
4.108	CN 6. A drone view of the site from the east.	137
4.109	CN 6. The numbered site grid, set on a contour map.	137
4.110	CN 6. The site core, as outlined at five levels of density, >2500, >3500, >6000, >8000 and >10,000 sherds per ha.	138
4.111	CN 6. The nearby areas of high off-site density (over 1000 sherds per ha), outlined in cream.	138
4.112	CN 6. The area selected for geophysical testing over the area of highest density at the site core.	139
4.113	CN 6. Interpretation of the geophysical testing, mapped on Figure 4.112.	139
4.114	CN 6. Histogram showing the representation of dated sherds by period.	140
4.115	CN 6. Distribution of finds dated to Archaic to Hellenistic.	140
4.116	CN 6. Distribution of finds dated to Classical / Hellenistic.	141
4.117	CN 6. The broader spectrum of Archaic / Hellenistic off-site finds.	141
4.118	CN 6. Distribution of finds dated to the Hellenistic period.	142
4.119	CN 6. Distribution of finds dated to the Roman/Late Roman era.	142
4.120	CN 6. Distribution of finds dated to the Late Roman period.	143
4.121	CN 6. Distribution of finds dated to sub-periods within the Hellenistic / Roman era.	143
4.122	CN 6. Distribution of finds dated to sub-periods of Roman, down to Middle Roman.	144
4.123	CN 6. Distribution of finds dated to Middle to Late Roman.	144
4.124	CN 6. Distribution of finds dated to the Hellenistic to Late Roman era.	145
4.125	CN 7. A drone view looking west, with Site CN 4 visible on the left, and the city Acropolis behind.	148
4.126	CN 7. Hard limestone soil in the vicinity of the site, with the maquis behind.	149
4.127	CN 7. The lower northern extension of the site.	149
4.128	CN 7. A stele base, probably recycled as building stone.	150
4.129	CN 7. A former tripod- or statue-base of the 3-holed variety, probably recycled as an olive press weight.	150
4.130	CN 7. Another view of the base in Figure 4.129, showing the added hole at the lower end.	151
4.131	CN 7. The area on the upper plateau tested by geophysics.	152
4.132	CN 7. Interpretation of geophysical results from Figure 4.131.	152
4.133	CN 7. Contoured map of the site, on and below the upper plateau.	153
4.134	CN 7. The nearby areas of high off-site density (over 2000 sherds per ha), outlined in cream.	153
4.135	CN 7. The site core, as outlined at five levels of density, >16,000, >22,750, >45,000, >72,000 and >147,500 sherds per ha.	154
4.136	CN 7. Histogram showing the representation of dated sherds by period.	154
4.137	CN 7. Distribution of finds from the site over the entire A-H era.	155
4.138	CN 7. The broader spectrum of off-site finds from the Archaic to the Hellenistic eras.	155
4.139	CN 7. Distribution of finds dated to the Roman to Late Roman periods.	156
4.140	CN 7. Distribution of finds dated to the sub-phases from Late Hellenistic to Middle Roman.	156
4.141	CN 7. Distribution of finds dated to the Middle/Late Roman periods.	157
4.142	CN 7. Distribution of finds dated to the Late Roman and possibly Early Byzantine periods.	157
4.143	CN 7. Distribution of finds dated to the Medieval era.	158
4.144	CN 7. Distribution of finds dated to the Ottoman to Early Modern era.	158
4.145	CN 8. A drone view of the site, looking eastwards, with the main plain to the right.	161
4.146	CN 8. A drone view of the site, looking southwards, with the main plain behind and the Acropolis of Hyettos rising on the right.	162

4.147	CN 8. <i>The stream bed, south of the site.</i>	162
4.148	CN 8. <i>Softer limestone soils with olives, to the north of the site.</i>	163
4.149	CN 8. <i>The numbered collection grid of the site, set on a contour map.</i>	164
4.150	CN 8. <i>The site core and halo, as outlined at five levels of density, &gt;4285, &gt;18,000, &gt;27,000, &gt;45,000 and 5&gt;8,000 sherds per ha.</i>	164
4.151	CN 8. <i>The nearby areas of high off-site density (over 4000 sherds per ha), outlined in cream.</i>	165
4.152	CN 8. <i>Histogram showing the representation of dated sherds by period.</i>	165
4.153	CN 8. <i>Distribution of sherds dated to the EIA to A/C eras.</i>	166
4.154	CN 8. <i>Distribution of sherds dated to the A/H and C/H eras.</i>	166
4.155	CN 8. <i>Distribution of sherds possibly dated to the Early Byzantine period.</i>	167
4.156	CN 8. <i>Distribution of finds dated to the Middle Byzantine period.</i>	167
4.157	CN 8. <i>Distribution of finds dated to the Middle and Late Byzantine periods.</i>	168
4.158	CN 8. <i>Distribution of finds dated to the generic Medieval era.</i>	168
4.159	CN 8. <i>Distribution of finds dated to the Frankish period.</i>	169
4.160	CN 9. <i>A drone photo of the site, taken from the west, showing also the plateau sector of Site CN 7.</i>	171
4.161	CN 9. <i>The site's setting on a low plateau in an olive grove.</i>	172
4.162	CN 9. <i>The slope from the site westwards down to the stream.</i>	172
4.163	CN 9. <i>Fertile soft mudstone soils on the site's low plateau.</i>	173
4.164	CN 9. <i>The nearby areas of high off-site density (over 1000 sherds per ha), outlined in cream.</i>	174
4.165	CN 9. <i>The numbered collection grid of the site, set on a contour map.</i>	174
4.166	CN 9. <i>The site core, as outlined at several potential alternative levels of density, c. 1100 beyond the grid, 2000-plus, 3000-plus and 4600-plus.</i>	175
4.167	CN 9. <i>Histogram showing the representation of dated sherds by period.</i>	175
4.168	CN 9. <i>Distribution of finds of several Prehistoric periods.</i>	176
4.169	CN 9. <i>Distribution of finds dated within the bracket Late Helladic to Hellenistic.</i>	176
4.170	CN 9. <i>Distribution of finds dated within the bracket Early Iron age to Hellenistic.</i>	177
4.171	CN 9. <i>Distribution of finds dated within the bracket Archaic / Classical / Hellenistic.</i>	177
4.172	CN 9. <i>The broader spectrum of off-site finds dated to the 'Archaic to Hellenistic' era, incorporating those of Classical and Classical / Hellenistic.</i>	178
4.173	CN 10. <i>A drone view of the site from the southeast.</i>	179
4.174	CN 10. <i>A drone view of the site with its neighbour, CN 14, from the southwest.</i>	180
4.175	CN 10. <i>Cultivation on the site.</i>	180
4.176	CN 10. <i>The numbered collection grid of the site, set on a contour map.</i>	182
4.177	CN 10 upper and CN 14 lower site grids. <i>The nearby areas of high off-site density, with a higher level at 5000+ shaded in cream.</i>	182
4.178	CN 10. <i>The lower halo, set at 1875+, a denser halo and the site core, as outlined at four levels of density, at 7000+, 10,500, 17,000+ and 23,000+ sherds per ha.</i>	183
4.179	CN 10. <i>Histogram showing the representation of dated sherds by period.</i>	183
4.180	CN 10. <i>A generic map of the off-site finds of all ancient Greek periods.</i>	184
4.181	CN 10. <i>Distribution of finds dated to Roman / Late Roman.</i>	184
4.182	CN 10. <i>Distribution of finds dated to Middle / Late Roman.</i>	185
4.183	CN 10. <i>Distribution of finds dated to Late Roman.</i>	185
4.184	CN 10. <i>Generic map of the off-site finds of all Roman sub-periods.</i>	186
4.185	CN 14. <i>A view southwards to the ridge with Site CN 15 on its other side.</i>	188
4.186	CN 14. <i>A reverse view to the previous figure, from the ridge with site CN 15 back to the CN 10/14 slopes.</i>	188
4.187	CN 14. <i>The view south-southeast to CN 13 and the city in the distance.</i>	189
4.188	CN 14. <i>Close-up view across the site from the southwest.</i>	189
4.189	CN 14. <i>The numbered collection grid of the site, set on a contour map.</i>	190
4.190	CN 14. <i>With a halo set at 1333+, the site core is outlined at three different levels of density, 8250, 10,000 and 19,000 sph.</i>	191
4.191	CN 14. <i>Histogram showing the representation of dated sherds by period.</i>	191
4.192	CN 14. <i>Distribution of finds dated to the Early Iron Age to Archaic / Classical eras.</i>	192
4.193	CN 14. <i>Distribution of finds dated within the Archaic to Hellenistic era.</i>	192
4.194	CN 14. <i>Distribution of finds dated to the Roman / Late Roman era.</i>	193

4.195	CN 14. Distribution of finds dated to the Middle / Late Roman periods.	193
4.196	CN 14. Distribution of finds dated to the Late Roman period.	194
4.197	CN 11. A drone view of the site from the south-southeast.	195
4.198	CN 11. The land surface in the area of the site.	196
4.199	CN 11. The remains of the pithos burial just east of the site.	197
4.200	CN 11. A drone view showing the location of the pithos burial in the bank at the top of the central olive grove.	197
4.201	CN 11. The numbered collection grid of the site, set against a contour map.	198
4.202	CN 11. The nearby areas of high off-site density (over 1000 sherds per ha), outlined in cream.	198
4.203	CN 11. The site core, as outlined at three levels of density, 2500, 7000 and 10,500 sherds per ha.	199
4.204	CN 11. Histogram showing the representation of dated sherds by period.	199
4.205a	CN 11. Distribution of finds dated to the Early Iron Age to Archaic-Hellenistic eras.	200
4.205b	CN 11. Distribution of finds dated to the Archaic-Classical eras.	200
4.205c	CN 11. Distribution of finds dated to the Classical-Hellenistic eras.	201
4.206	CN 11. A generic map of the off-site finds of all ancient Greek periods.	201
4.207	CN 11. Distribution of finds dated to the Hellenistic period.	202
4.208	CN 11. Distribution of finds dated to the Roman / Late Roman era.	202
4.209	CN 11. Distribution of finds dated to the Hellenistic to Middle Roman era.	203
4.210	CN 11. Generic map of the off-site finds of all Roman sub-periods, with added circle of radius c. 131 m.	203
4.211	CN 11. Geophysical testing in process on the site in 1994.	204
4.212	CN 11. Interpretation of the geophysical results, showing their location within the site.	205
4.213	CN 11. The same interpretation as in Figure 4.212, showing the building running along the contours of the slope.	205
4.214	CN 12. A drone view of the site from the west.	207
4.215	CN 12. A drone view of the site from the southeast.	207
4.216	CN 12. The seasonal stream-bed running south from the site.	208
4.217	CN 12. The wider landscape to the south of the site.	208
4.218	CN 12. The numbered site grid, set against a contour background.	209
4.219	CN 12. The nearby areas of high off-site density (over 500 sherds per ha), outlined in cream.	209
4.220	CN 12. The site core, as outlined at three levels of density, c. >1100 (largely outside the grid), >2250 and 4333-plus.	210
4.221	CN 12. Histogram showing the representation of dated finds by period.	210
4.222	CN 12. Distribution of finds dated to the Archaic / Classical / Hellenistic periods.	211
4.223	CN 12. Distribution of finds dated to the Hellenistic period.	211
4.224	CN 13. A drone view of the site, looking eastwards.	212
4.225	CN 13. A view looking down on the site, with the Acropolis of Hyettos in the background.	213
4.226	CN 13. A close-up view of mudstone soils north of CN 13.	213
4.227	CN 13. The numbered site grid, set against a contour map.	214
4.228	CN 13. The nearby areas of high off-site density (over 1000 sherds per ha), outlined in cream.	214
4.229	CN 13. The site core, as outlined at three different levels of density, >2750, >4000 and >10,000.	215
4.230	CN 13. Histogram showing the representation of dated finds by period.	215
4.231	CN 13. Distribution of finds dated to the Archaic / Hellenistic and Classical / Hellenistic eras.	216
4.232	CN 13. The broader spectrum of off-site finds dated to the 'Archaic to Hellenistic', Classical and Classical / Hellenistic eras.	217
4.233	CN 13. Distribution of finds dated to the Roman / Late Roman era.	217
4.234	CN 15. A drone view of the site from the northeast.	219
4.235	CN 15. Mudstone conglomerate between CN 17 and CN 15.	220
4.236	CN 15. Fertile land towards Loutsi in mudstone.	220
4.237	CN 15. The site viewed from the south.	221
4.238	CN 15. The view from the plateau above the site, southwards to Hyettos.	221
4.239	CN 15. The numbered site grid, set against a contour map.	222
4.240	CN 15. The site core, as outlined at three levels of density (>1000, >3000 and >5000 sph).	222
4.241	CN 15. The nearby areas of high off-site density at 1000-plus, outlined in cream.	223
4.242	CN 15. An unusual block, evidently of marble, as seen on discovery at the lower end of the site.	223

4.243	CN 15. <i>On-site sketch of the block in Figure 4.239.</i>	224
4.244	CN 15. <i>Photograph of the entablature, built entirely of earlier spolia, in the Church of Agios Nikolaos, Ekantontapyliani on Paros.</i>	224
4.245	CN 15. <i>Histogram showing the representation of the dated finds by period.</i>	225
4.246	CN 15. <i>Distribution of finds dated to the Archaic / Hellenistic era.</i>	225
4.247	CN 15. <i>Distribution of finds dated to the Early Byzantine and adjacent periods.</i>	226
4.248	CN 15. <i>Distribution of finds dated to the Middle Byzantine period.</i>	226
4.249	CN 15. <i>Distribution of finds dated to the Middle to Late Byzantine periods.</i>	227
4.250	CN 16. <i>A near-vertical drone view, with the course of the canal visible.</i>	228
4.251	CN 16. <i>View along a visible stretch of the canal.</i>	229
4.252	CN 16. <i>The nearby areas of high off-site density, outlined in colour.</i>	229
4.253	CN 17. <i>A drone view of the site, taken from the west.</i>	230
4.254	CN 17. <i>View of the site from the south, showing fertile mudstone soil under plough.</i>	231
4.255	CN 17. <i>The numbered site grid, set against a contour map.</i>	232
4.256	CN 17. <i>The nearby areas of high off-site density (over 2500 sph) outlined in cream.</i>	232
4.257	CN 17. <i>The site core, as outlined at two levels of density, &gt;6333 and &gt;10,000 sph.</i>	233
4.258	CN 17. <i>Histogram showing the representation of dated finds by period.</i>	233
4.259	CN 17. <i>Distribution of finds dated to the Archaic to Classical to Hellenistic eras.</i>	234
4.260	CN 17. <i>Generic map of the off-site finds of all ancient Greek sub-periods.</i>	234
4.261	CN 17. <i>Distribution of finds dated to the Hellenistic / Roman era.</i>	235
4.262	CN 17. <i>Distribution of finds dated to the Roman / Late Roman era.</i>	235
4.263	CN 17. <i>Distribution of finds dated between the Roman and the Medieval eras.</i>	236
4.264	CN 17. <i>Distribution of finds dated to the Middle Byzantine to Frankish period.</i>	236
4.265	CN 17. <i>Distribution of finds dated within the generic Medieval era.</i>	237
4.266	<i>A map locating all the off-site find-spots of Prehistoric sherds in the Hyettos rural survey area.</i>	239
4.267	<i>A view of the Palaikastro ridge, looking south from the Lower Town of Hyettos.</i>	239
4.268	<i>Emeri Farinetti's map, showing the Greco-Roman settlement network around Hyettos.</i>	240
5.1	<i>The survey grid for the city site of Hyettos.</i>	244
5.2	<i>Distribution over the city site of finds dated to the Neolithic era.</i>	245
5.3	<i>Distribution over the city site of finds dated to the Final Neolithic and Early Helladic periods.</i>	246
5.4	<i>Distribution over the city site of finds dated to the Middle Helladic period.</i>	247
5.5	<i>Distribution over the city site of finds dated to the Middle to Late Helladic and Late Helladic periods.</i>	248
5.6	<i>Distribution over the city site of finds dated generically to the Prehistoric era.</i>	249
5.7	<i>Distribution over the city site of lithic finds.</i>	250
5.8	<i>Distribution of finds dated to the Early Iron Age and adjacent or related sub-periods.</i>	253
5.9	<i>Distribution of finds dated to the Early Iron Age to Archaic era and the Late Geometric to Archaic period.</i>	255
5.10	<i>Distribution of finds dated to the period range from Late Helladic to Hellenistic.</i>	256
5.11	<i>Distribution of finds dated over the period range from Early Iron Age to Geometric, Archaic, Classical and Hellenistic.</i>	257
5.12	<i>Distribution of finds dated to the Archaic period.</i>	259
5.13	<i>Distribution of finds dated to the Archaic / Classical periods.</i>	260
5.14	<i>Distribution of finds dated to the Classical [Greek] period.</i>	262
5.15	<i>Distribution of finds dated to the Archaic to Hellenistic periods.</i>	263
5.16	<i>Distribution of finds dated to the Classical / Hellenistic period.</i>	264
5.17	<i>A map of the probable overall territory of the city state of Hyettos, with added indications of the main areas of fertile land.</i>	267
5.18	<i>Distribution of finds dated to the Hellenistic period, compared with the earlier map for the Archaic-Hellenistic era.</i>	269
5.19	<i>Distribution of finds dated from the Classical to the Middle Hellenistic periods.</i>	271
5.20	<i>Distribution of finds dated to the Middle to Late Hellenistic periods.</i>	272
5.21	<i>The same distributions as in Figure 5.20, but with the Late Hellenistic finds circled.</i>	273
5.22	<i>Distribution of finds dated to the Late Hellenistic to Early and Middle Roman periods, with the main concentrations circled and comparison with the Middle / Late Hellenistic sherd focus.</i>	275
5.23	<i>Distribution of finds dated to the Early Roman period.</i>	276

5.24	<i>Distribution of finds dated to the Early to Middle Roman periods.</i>	277
5.25	<i>Distribution of finds dated to the Middle Roman period.</i>	278
5.26	<i>Distribution of finds, essentially confined to the Acropolis, of generic 'Roman' date.</i>	279
5.27	<i>Distribution of finds dated to the Middle to Late Roman periods, set beside the earlier map for the Archaic to Hellenistic era.</i>	281
5.28	<i>Distribution of finds dated to the Late Roman period, juxtaposed with that for the Middle Roman.</i>	282
5.29	<i>Distribution of finds dated to the Roman / Late Roman era, again set beside that for the Archaic to Hellenistic era.</i>	283
5.30	<i>Distribution of finds dated to the Late Roman to Early Byzantine era.</i>	286
5.31	<i>Distribution of finds dated to the broad Medieval era, incorporating the Middle to Late Byzantine period.</i>	287
5.32	<i>Distribution of finds dated to the Middle Byzantine to Frankish period.</i>	288
5.33	<i>Distribution of finds dated to the Ottoman (Turkish) era.</i>	290
5.34	<i>Distribution of finds dated from the Medieval to Early Modern and Modern eras.</i>	291
6.1	<i>The Hyettos geoarchaeological study area, outlined in red.</i>	294
6.2	<i>The inner (3-km radius) and outer (5-km radius) zones of agricultural influence around the acropolis at Hyettos.</i>	295
6.3	<i>A digitized version of the IGME geological map and 5 m contours from the 1/5000 topographic map.</i>	296
6.4	<i>Points, lines and polygons recorded during the geomorphological survey plotted against 1/5000 contours.</i>	301
6.5	<i>Geomorphological / geological map of the Hyettos geoarchaeological study area produced from the new mapping data.</i>	302
6.6	<i>View southwards from the northern margin of the Thoda ridge towards the Hyettos acropolis.</i>	303
6.7	<i>Fault scarp exposed in limestones at HY14-38.</i>	303
6.8	<i>Former quarry to the southwest of the Acropolis hill, from which ironstone has been extracted.</i>	304
6.9	<i>The zones A to I described in the text, to illustrate major concentrations of land of each of the various types.</i>	307
7.1	<i>Annotated air photograph of the site of ancient Thespiiai.</i>	316
7.2	<i>The density values in sherds per hectare for the city of Thespiiai and its southern inner hinterland</i>	317
7.3	<i>Annotated air photograph of the site of ancient Hyettos.</i>	318
7.4	<i>The ceramic density across Hyettos city with 'city density' outlined at 22,126 sherds per ha and above.</i>	319
7.5	<i>The city site of Hyettos: the revised extent of the built-up area, as revealed by the locations of the magnetic susceptibility sampling lines and other geophysical results.</i>	320
7.6	<i>The city site of Hyettos, showing the locations of the 1994 and 1995 soil survey transects, and the 2015 transect, along with the geophysical results in outline.</i>	321
7.7	<i>The city of Hyettos: the results of the geophysical testing of the Lower Town.</i>	322
7.8	<i>Hyettos: an archaeological interpretation of the main findings within the city survey grid.</i>	323
7.9	<i>Thespiiai: the values obtained for Lead, Zinc and Copper in the 1990 transect running from the core of the ancient city to beyond its southern edge.</i>	324
7.10	<i>Thespiiai: a comparison of the mean values for Lead, Zinc, Copper, Manganese and Nickel obtained at the ancient city site with those from the region as a whole.</i>	325
7.11	<i>Hyettos: concentrations of Copper found in the soil transects laid out in 1994, 1995 and 2015.</i>	326
7.12	<i>Hyettos: concentrations of Lead found in the soil transects laid out in 1994, 1995 and 2015.</i>	327
7.13	<i>Hyettos: concentrations of Zinc found in the soil transects laid out in 1994, 1995 and 2015.</i>	328
7.14	<i>Hyettos: concentrations of Phosphorus found in the soil transects laid out in 1994, 1995 and 2015.</i>	329
7.15	<i>Hyettos: concentrations of Nickel found in the soil transects laid out in 1994, 1995 and 2015.</i>	330
7.16	<i>Hyettos: concentrations of Iron oxide found in the soil transects laid out in 1994, 1995 and 2015.</i>	331
7.17	<i>Hyettos: concentrations of Cobalt found in the soil transects laid out in 1994, 1995 and 2015.</i>	332
7.18	<i>Hyettos: concentrations of Potassium found in the soil transects laid out in 1994, 1995 and 2015.</i>	333
7.19	<i>Hyettos: concentrations of Calcium found in the soil transects laid out in 1994, 1995 and 2015.</i>	334
7.20	<i>Hyettos: concentrations of Barium found in the soil transects laid out in 1994, 1995 and 2015.</i>	335
7.21	<i>Hyettos: concentrations of Strontium found in the soil transects laid out in 1994, 1995 and 2015.</i>	336
7.22	<i>Period maps of the ceramic finds in the city site at Hyettos, showing the degree of spatial contraction between 'Archaic-Hellenistic' and 'Middle to Late Roman'.</i>	339
7.23	<i>Location of the 1230 m soil sample transect taken by Rimmington.</i>	341
7.24	<i>Figure 3.11 from Rimmington 1998.</i>	342

8.1	<i>Overlay of the 2013, 2014 and 2015 grids on WorldView 2 satellite image.</i>	346
8.2	<i>Locations of the magnetic susceptibility transects.</i>	347
8.3	<i>Examples of GPR depth slices from the centre of the Lower Town.</i>	348
8.4	<i>Results from satellite remote sensing image processing.</i>	349
8.5	<i>Diagrammatic representation of geophysical anomalies with codings.</i>	350
8.6	<i>The integrated magnetic map from Hyettos.</i>	351
8.7	<i>The two magnetic anomalies, M1 and M2, attributed to the magnetic ores, and the results of the ERT measurements.</i>	352
8.8	<i>Results of the variation in magnetic susceptibility along the three different profiles that were laid out over the site.</i>	352
8.9	<i>Overlay of the processed GPR slices of shallow and medium depth on satellite image of the site</i>	353
8.10	<i>GPR reflectors G4, G7, G8/G9 and G1 that appeared at shallow depths (&lt;1 m).</i>	354
8.11	<i>Overlay of the integrated processed resistance mapping data at Hyettos on satellite image of the site.</i>	356
8.12	<i>Results of the EMI magnetic susceptibility surveying at Hyettos.</i>	357
8.13	<i>Integrated diagrammatic interpretation of the geophysical anomalies that were registered by all the geophysical techniques at Hyettos, in the 2013–2014–2015 fieldwork seasons.</i>	358
8.14	<i>Integrated diagrammatic interpretation of the geophysical anomalies that were registered by all the geophysical techniques at Hyettos and representation of the suggested street and grid plan.</i>	359
8.15	<i>A reconstruction of the plan of the Lower Town of Hyettos, based on the geophysical measurements.</i>	360
9.1	<i>Locations of the building blocks, with modern roads and tracks, superimposed on satellite photo of the site.</i>	364
9.2	<i>Map to illustrate the application of kernel density.</i>	366
9.3	<i>Map to illustrate the application of fishnet density.</i>	367
9.4a	<i>Slope map of the city site of Hyettos.</i>	368
9.4b	<i>Slope map of the city site of Koroneia.</i>	369
9.5	<i>Distribution of the architectural finds that are not generic blocks.</i>	371
9.6	<i>Column capital, marked with a much later scratched cross; and impost block from an arch, decorated with a carved cross.</i>	373
9.7	<i>Map of the inferred sanctuary area, showing the distribution of columns, capitals and larger architectural blocks, with buildings detected by geophysics outlined in red.</i>	374
9.8	<i>A specimen of the blocks, initially interpreted as olive press weights, with larger and smaller holes – originally five in this case – drilled into their upper side.</i>	375
9.9	<i>An example of a stele base (# 1569).</i>	378
9.10	<i>A hypothetical distribution of the quantities of blocks, based on their dimensions.</i>	379
9.11	<i>The distribution of blocks at Hyettos according to length in centimetres.</i>	380
9.12	<i>The comparative distribution of blocks at Hyettos and Koroneia, according to length; and an alternative model where a smoother distribution of block lengths disguises two curves of domestic and public blocks.</i>	380
9.13	<i>The average length of the blocks in each cell superimposed on the overall find density of that cell.</i>	382
9.14	<i>Distribution in percentages of limestone blocks, hard and soft, according to length.</i>	383
9.15	<i>Map of the vertical elevations identified at Hyettos.</i>	385
10.1	<i>The inscribed Acropolis wall, now partly overgrown, as it appeared in 2019.</i>	389
10.2	<i>The very latest recruitment list on the Acropolis wall, from the 160s BC.</i>	390
10.3	<i>Statue base in honour of Septimius Severus, in the church of Agios Athanasios on the Acropolis of Hyettos.</i>	393
10.4	<i>Statue base in honour of Caracalla, in the church of Agios Ioannis Chrysostomos at Loutsi.</i>	394
10.5	<i>Decree of the sacred gerusia of Asklepios at Hyettos, in the church of Agios Nikolaos that adjoins the Lower Town of Hyettos.</i>	395

11.12	<i>Middle Helladic and Transitional Middle to Late Helladic pottery.</i>	410
11.13	<i>Late Helladic painted pottery.</i>	411
12.1	<i>The complete City find-assemblage by date, distinguishing city and sanctuary area.</i>	415
12.2	<i>City of Hyettos: parts of vessels in the Early Iron Age-Hellenistic find-assemblage.</i>	416
12.3	<i>City of Hyettos: the Early Iron Age-Hellenistic find-assemblage.</i>	417
12.4	<i>City of Hyettos: Hellenistic lekane rims of Agora form I.</i>	418
12.5	<i>City of Hyettos: Archaic banded fine ware amphora rims, Hyettos 'form 2'.</i>	418
12.6	<i>The Early Iron Age and Bronze Age to Early Iron Age find-assemblages from the City.</i>	419
12.7	<i>The Early Iron Age to Archaic or Classical and the Bronze Age to Archaic or Classical find-assemblages from the City.</i>	420
12.8	<i>Hy91.Sa.599.3, an Archaic-Classical 'Hyettos form 2' amphora rim in fabric 7 from the City.</i>	421
12.9	<i>The Archaic find-assemblage from the City.</i>	422
12.10	<i>The Archaic-Classical find-assemblage from the City.</i>	423
12.11	<i>The Classical find-assemblage from the City.</i>	424
12.12	<i>The Archaic-Hellenistic find-assemblage from the City.</i>	425
12.13	<i>The Classical-Hellenistic find-assemblage from the City.</i>	426
12.14	<i>The combined Archaic-Hellenistic find-assemblages from the City.</i>	428
12.15	<i>The ten most frequent vase shapes in the Early Iron Age to Hellenistic (-Roman) find-assemblage from the City.</i>	428
12.16	<i>The Hellenistic find-assemblage from the City.</i>	429
12.17	<i>The Hellenistic-Roman find-assemblage from the City.</i>	430
12.18	<i>The Hellenistic and Hellenistic-Roman find-assemblages from the City.</i>	431
12.19	<i>Hy.91.GS11.525.29, rim of a Late Geometric-Archaic large open vessel with painted decoration from the City sanctuary area.</i>	434
12.20	<i>Hy.92.CS.Sa.2.4, rim of a Classical kantharos with painted decoration from the City Sanctuary area.</i>	434
12.21	<i>Hy.92.CS.Sa.2.130+156, two joining base fragments of a Black Gloss Classical kantharos from the City Sanctuary area.</i>	434
12.22	<i>Hy.11.Sa.B34.B33, base of a Classical large banded bowl (lekane or lekane) from the City Sanctuary area.</i>	434
12.23	<i>The City sanctuary area: the find-assemblage by date.</i>	435
12.24	<i>The City sanctuary area: the find-assemblage.</i>	436
12.25	<i>The ten most frequent vase shapes in the Early Iron Age to Hellenistic (-Roman) find-assemblage from the City, over time.</i>	438
12.26	<i>Hyettos rural off-site survey.</i>	439
12.27	<i>The rural off-site survey: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	440
12.28	<i>The rural off-site survey: the 'real' off-site find-assemblage and the site area find-assemblage compared.</i>	441
12.29	<i>The rural off-site survey: the complete find-assemblage, excluding finds from site areas, by date.</i>	442
12.30	<i>The rural off-site survey: the Early Iron Age-Hellenistic find-assemblage, excluding finds from site areas.</i>	443
12.31	<i>The rural off-site survey: map of the distribution of finds dated Archaic, Classical, Archaic-Classical, Archaic-Hellenistic and Classical-Hellenistic.</i>	444
12.32	<i>The rural off-site survey: map of the distribution of Archaic-Hellenistic pottery, projected on to an aerial photograph, indicating zones of similar densities.</i>	445
12.33	<i>The rural off-site survey: map of the distribution of Archaic-Hellenistic pottery, projected on to an aerial photograph, indicating present-day roads, stream-beds and wet zones.</i>	445
12.34	<i>The rural off-site survey: the Hellenistic find-assemblage, including finds from site areas.</i>	446
12.35	<i>The rural off-site survey: the Archaic, Classical, Archaic-Classical, Archaic-Hellenistic and Classical-Hellenistic find-assemblage, including finds from site areas.</i>	447
12.36	<i>The rural off-site survey: the Late Helladic-Early Iron Age to Early Iron Age-Classical find-assemblage.</i>	449
12.37	<i>The rural off-site survey: the ten most frequent vase shapes in the Early Iron Age to Hellenistic (-Roman) find-assemblage, excluding finds from site areas, over time.</i>	450

12.38	<i>The rural site survey: the combined assemblage, by date.</i>	452
12.39	<i>The rural site survey: the combined Early Iron Age to Hellenistic (-Roman) find-assemblages, by date.</i>	452
12.40	<i>The rural site survey: the combined Early Iron Age to Hellenistic (-Roman) find-assemblages.</i>	453
12.41	<i>The rural site survey: the complete individual site assemblages.</i>	456
12.42	<i>The rural site survey: the Early Iron Age to Hellenistic (-Roman) finds.</i>	457
12.43	<i>The rural site survey: the Early Iron Age to Hellenistic (-Roman) finds.</i>	458
12.44	<i>The rural site survey: the combined pre-Roman site assemblages by date.</i>	459
12.45	<i>The rural site survey: the ten most frequent vase shapes in the combined Early Iron Age to Hellenistic (-Roman) site assemblages.</i>	459
12.46	<i>Site CN 10: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	461
12.47	<i>Site CN 15: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	462
12.48	<i>The rural site survey, Site CN 5: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	463
12.49	<i>The rural site survey, Site CN 7: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	465
12.50	<i>The rural site survey, Site CN 14: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	466
12.51	<i>The rural site survey, Site CN 17: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	467
12.52	<i>The rural site survey, Site CN 3: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	468
12.53	<i>The rural site survey, Site CN 13: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	470
12.54	<i>The rural site survey, Site CN 11: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	471
12.55	<i>The rural site survey, Site CN 1: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	472
12.56	<i>The rural site survey, Site CN 9: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	473
12.57	<i>The rural site survey, Site CN 2: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	475
12.58	<i>The rural site survey, Sites CN 2 (a) and CN 6 (b): the ten most frequent vase shapes in the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	476
12.59	<i>The rural site survey, Site CN 6: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	477
13.1	<i>A comparison of the assignments of single-period finds from Thespiiai and Hyettos.</i>	485
13.2	<i>LHELL–LR artefacts found in the urban zone that are associated with pottery manufacture.</i>	487
13.3	<i>Fragment of an over-fired roof-tile fused with the warped base and lower wall of a small closed vessel.</i>	488
13.4	<i>Microscope photographs of two fragments in Fabric Group 3, and a lekane fragment.</i>	488
13.5	<i>A selection of fragments (presumably) manufactured at Koroneia.</i>	491
13.6	<i>A selection of fragments (mostly amphorae) in Fabric 11.</i>	493
13.7	<i>Fragment of TWW Thorn Ware, presumably from (northern) Italy.</i>	495
13.8	<i>Fragment of a dish presumably from Elateia.</i>	498
13.9	<i>Fragments of two oil lamps, presumably from Attic workshops.</i>	499
13.10	<i>Fragment of a LR oil lamp, presumably of Boeotian or central Greek manufacture.</i>	499
13.11	<i>The area covered by the Hyettos rural / off-site survey, with indication of the rural site locations, and of the more elevated and flatter zones of the terrain.</i>	503
13.12	<i>A selection of mostly MR–LR pottery from Site CN 7.</i>	511
13.13	<i>The functional spectrum, in relative quantities, of the MR–LR and R–LR pottery combined for rural sites CN 10 / 14, CN 5, CN 7, CN 17, CN 3 and CN 6.</i>	518
13.14	<i>A selection of ARSW fragments collected at Hyettos, including two fragments from CN 7.</i>	520
13.15	<i>A linear, quantitative overview of ARSW from urban and rural Hyettos and urban Thespiiai.</i>	521
13.16	<i>A selection of Zest 80 and Knossos 39 fragments from Hyettos.</i>	523
13.17	<i>A selection of Zest 80 and Knossos 39 fragments from Hyettos.</i>	524
13.18	<i>The distribution of Zest 80 and Knossos 39 fragments in the urban area, and the distribution in the off-site zone.</i>	525
13.19	<i>A selection of Zest 80 (and Knossos 39?) fragments from the intensive survey of urban Tanagra.</i>	526
13.20	<i>Fresh breaks of a Zest 80 / Knossos 39 handle and a Kapitän II handle, both from the intensive survey of urban Tanagra.</i>	526
13.21	<i>Microscope photographs of fresh breaks of a Kapitän II, a Knossos 39, a Zest 80 and a Zest 80.</i>	527
13.22	<i>The quantitative-geographical role of local, Boeotian, central / southern Greek, Aegean, and long-distance imported pottery, with percentages recalculated from the total number of provenance-identified fragments.</i>	529
13.23	<i>A selection of imported pottery.</i>	531
13.24	<i>A fragment possibly of a bread stamp.</i>	535

14.1	<i>Fragmentation patterns of MBYZ and MBYZ-F pottery sherds from Site CN 3.</i>	539
14.2	<i>Line chart showing the percentages of the different chronological phases represented in the district of Hyettos by dated surface ceramic finds from across post-Roman sites.</i>	543
14.3	<i>Percentages of post-Roman pottery functions represented in the Hyettos district assemblage.</i>	543
14.4	<i>Percentages of post-Roman pottery shapes represented in the Hyettos district assemblage.</i>	544
14.5	<i>Radar chart showing the popularity of different tableware shapes in the MBYZ, F and T periods.</i>	545
14.6	<i>A typical middle-tenth to middle-fourteenth-century tableware assemblage.</i>	546
14.7	<i>A typical eleventh- to middle-fourteenth-century common ware assemblage.</i>	547
14.8	<i>The percentage of different functional categories of the post-Roman era, as reconstructed by the variety of pottery shapes from the former ancient city of Hyettos.</i>	550
14.9	<i>Plan of the standing church of Agios Athanasios on the acropolis of the former ancient city of Hyettos.</i>	552
14.10	<i>The screen and south wall of the church of Agios Athanasios.</i>	553
14.11	<i>The Virgin enthroned, holding the baby Christ and venerated by four angels, painted on the vaulted roof of the church of Agios Athanasios.</i>	553
14.12	<i>The percentage of different functional categories of the post-Roman era, as reconstructed by the variety of pottery shapes from Site CN 3.</i>	556
14.13	<i>The percentage of different functional categories of the post-Roman era, as reconstructed by the variety of pottery shapes from Site CN 4.</i>	557
14.14	<i>Plan of the ruined longhouses and other structures at site CN 4.</i>	559
14.15	<i>The percentage of different functional categories of the post-Roman era, as reconstructed by the variety of pottery shapes from Site CN 8.</i>	561
14.16	<i>The percentage of different functional categories of the post-Roman era, as reconstructed by the variety of pottery shapes from Site CN 15.</i>	562
14.17	<i>The percentage of different functional categories of the post-Roman era, as reconstructed by the variety of pottery shapes from Site CN 17.</i>	563
14.18	<i>Photographs of cross-sections of ten fabric types recognized in the Hyettos region.</i>	565
14.19	<i>The percentages of different common-ware fabrics identified in the post-Roman assemblage from the district of Hyettos.</i>	568
14.20	<i>The percentages of different tableware fabrics identified in the post-Roman assemblage from the district of Hyettos.</i>	570
14.21	<i>The percentages of different EBYZ-T common wares from the Hyettos district by fabric.</i>	572
14.22	<i>EBYZ fragments from the district of Hyettos.</i>	573
14.23	<i>The percentages of different EBYZ-T tablewares from the Hyettos district by fabric.</i>	574
14.24	<i>EBYZ and MBYZ fragments from the Hyettos district.</i>	575
14.25	<i>MBYZ fragments from the district of Hyettos.</i>	577
14.26	<i>MBYZ fragments from the district of Hyettos.</i>	578
14.27	<i>MBYZ fragments from the district of Hyettos.</i>	579
14.28	<i>MBYZ and MBYZ-F fragments from the district of Hyettos.</i>	580
14.29	<i>MBYZ-F and F fragments from the district of Hyettos.</i>	583
14.30	<i>F-T, T and EMOD fragments from the district of Hyettos.</i>	587
14.31	<i>Ceramic imports to the region of Hyettos from within Boeotia and perhaps Corinth.</i>	590
14.32	<i>Ceramic imports to the region of Hyettos from outside Boeotia.</i>	591
16.1	<i>Key to the symbols used on the maps in this chapter.</i>	599
16.2	<i>Distribution of finds dated to the Neolithic era.</i>	604
16.3	<i>Rural distribution of finds dated to the Neolithic to Early Helladic, Early Helladic, Early to Middle Helladic, and Middle Helladic periods.</i>	606
16.4	<i>Rural distribution of finds dated to the Middle to Late and Late Helladic periods.</i>	607
16.5	<i>Rural distribution of finds dated generically to 'Bronze Age' and 'Prehistoric' eras.</i>	608
16.6	<i>Rural distribution of lithic finds of all periods.</i>	609
16.7	<i>Possible prehistoric site or activity foci in the off-site areas, circled.</i>	610
16.8	<i>Map to show notional territorial boundaries between known prehistoric locations in a wider area around Hyettos.</i>	612
16.9	<i>Rural distribution of possible Early Iron Age, and definite Late Helladic or Bronze Age to Early Iron Age finds.</i>	614

16.10	<i>Rural distribution of finds in the classes Prehistoric, Bronze Age or Late Helladic to Archaic, with Late Geometric to Archaic and definite and possible Early Iron Age to Archaic finds.</i>	615
16.11	<i>Rural distribution of Bronze Age to Classical / Hellenistic finds.</i>	616
16.12	<i>Rural distribution of finds in the classes Late Helladic to Archaic, Early Iron Age to Archaic, Late Geometric to Archaic and Early Iron Age to Hellenistic.</i>	617
16.13	<i>Rural distribution of Archaic and Archaic to Classical finds.</i>	618
16.14	<i>Rural distribution of Archaic to Hellenistic, Classical and Classical to Hellenistic finds.</i>	619
16.15	<i>Rural distribution of Hellenistic, Early to Middle Hellenistic, and Middle to Late Hellenistic finds.</i>	620
16.16	<i>Map comparing the distribution of the Archaic to Hellenistic finds with the soil types in the surveyed rural area.</i>	621
16.17	<i>Map to show the more outlying districts within the likely chora of Hyettos.</i>	622
16.18	<i>Map repeating the data on Figure 16.17, with the addition of modern place-names.</i>	623
16.19	<i>Rural distribution of Late Hellenistic to Early Roman finds.</i>	631
16.20	<i>Rural distribution of Early and Early to Middle Roman finds.</i>	632
16.21	<i>Rural distribution of Middle and Middle to Late Roman finds.</i>	634
16.22	<i>Rural distribution of Late Roman finds.</i>	635
16.23	<i>Cumulative rural distribution of all finds, definite and possible, dated to all eras from Early to Late Roman.</i>	636
16.24	<i>Rural distribution of finds dated only to the cross-period class 'Roman to Late Roman'.</i>	637
16.25	<i>Protected storage of perforated blocks, all from the southeastern part of the City site at Hyettos, kept in the churchyard of Agios David.</i>	638
16.26	<i>Rural distribution of the Late Roman to Byzantine, Early Byzantine and Early to Middle Byzantine finds.</i>	639
16.27	<i>Rural distribution of Middle Byzantine finds.</i>	640
16.28	<i>Map repeating the data on Figure 16.27, but marking with an oval outline the entire cluster of Middle Byzantine finds, on- and off-site.</i>	641
16.29	<i>Rural distribution of finds of Middle to Late Byzantine date.</i>	642
16.30	<i>Rural distribution of finds of Frankish date.</i>	643
16.31	<i>Rural distribution of finds of generic Medieval date.</i>	644
16.32	<i>Map of Boeotia, showing the settlement pattern as recorded in the Ottoman defter of 1466.</i>	645
16.33	<i>Map of Boeotia, showing the settlement pattern as recorded in the Ottoman defter of 1570.</i>	646
16.34	<i>Rural distribution of Frankish to Ottoman and Ottoman finds.</i>	647
16.35	<i>Map of Boeotia, showing the settlement pattern as recorded in the Ottoman defter of 1687–1688.</i>	648
16.36	<i>Rural distribution of Ottoman to Early Modern, Ottoman to Modern, Early Modern, post-Medieval and Modern finds.</i>	649
16.37	<i>Signpost at Pavlo village, directing visitors to Hyettos as 'the ancient Acropolis of Pavlo'.</i>	649
17.1	<i>View south from the rural Site CN 14, across Site CN 13.</i>	663
17.2	<i>Team leader Kostas Sbonias with the herd of goats, 1989.</i>	664
17.3	<i>Bart Noordervliet on the ancient rock-cut stairway on the Acropolis.</i>	664
17.4	<i>The stretch of the external Acropolis wall inscribed, much later, with the Hellenistic annual registers of new citizens.</i>	665
17.5	<i>The spread and amount of imported tableware from beyond Boeotia for the Hyettos study area, including the city, in the Late Hellenistic-Early Roman periods.</i>	666
17.6	<i>The spread and amount of imported tableware from beyond Boeotia for the Hyettos study area, including the city, in the Early Roman-Middle Roman periods.</i>	666
17.7	<i>The spread and amount of imported tableware from beyond Boeotia for the Hyettos study area, including the city, in the generic Roman-Late Roman period.</i>	667
17.8	<i>The spread and amount of imported tableware from beyond Boeotia for the city and rural hinterland of Tanagra city further east in Boeotia, for the Middle Roman-Late Roman periods.</i>	667

## Tables

3.1	<i>Sherd density for the off-site zones A–F.</i>	34
3.2	<i>Sherd density in the Blue Site area boxes.</i>	37
6.1	<i>Pearson correlation coefficients (<i>r</i>) between rainfall at four sites around Hyettos (1957–1986).</i>	295

7.1	<i>Examples of archaeological sites and features, and associated element enrichments in their soils.</i>	315
7.2	<i>The number and range of each element in the 1994 soil survey shown in cumulative form.</i>	337
7.3	<i>The elements recorded in the 1995 soil survey.</i>	337
8.1	<i>Technical details of the geophysical survey parameters.</i>	346
9.1	<i>Overview of the extent of area usable for construction.</i>	370
9.2	<i>Classification of architectural elements.</i>	370
9.3	<i>Measurements of architectural elements at various Classical-Hellenistic sites.</i>	379
9.4	<i>Quality of the blocks.</i>	384
11.1	<i>Periods represented at rural sites.</i>	399
12.1	<i>The rural off-site survey: numbers of dated finds, by period, in the 'site areas'; densities of dated finds, by period, in the 'site areas'.</i>	454
12.2	<i>The rural off-site survey: numbers and densities of dated finds, by period, in the combined 'real off-site' areas.</i>	454
12.3	<i>The rural site survey, Site CN 4: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	460
12.4	<i>The rural site survey, Site CN 8: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	460
12.5	<i>The rural site survey: densities of dated finds, by period, on the sites.</i>	464
12.6	<i>The rural site survey, Site CN 12: the Early Iron Age to Hellenistic (-Roman) find-assemblage.</i>	469
13.1	<i>The absolute and relative quantities of sherds from the urban, rural site and off-site surveys.</i>	484
13.2	<i>A quantitative overview by functional category and shape, of all fragments that have been attributed to Koroneian manufacture.</i>	492
13.3	<i>Classification, by functional category, shape, and provenance, of pottery dated LHELL, ER and LHELL-ER from the urban survey of Hyettos.</i>	495
13.4	<i>Classification, by functional category, shape, and provenance, of pottery dated ER-MR from the urban survey of Hyettos.</i>	496
13.5	<i>Classification, by functional category, shape, and provenance, of pottery dated MR, LR and MR-LR from the urban survey of Hyettos.</i>	497
13.6	<i>Classification, by functional category, of LHELL-LR pottery from the area of the south cemetery.</i>	500
13.7	<i>Classification, by functional category, shape, and provenance, of pottery dated LHELL-MR, LHELL-LR and R-LR from the urban survey of Hyettos.</i>	501
13.8	<i>Classification, by functional category, shape, and provenance, of pottery dated LHELL-ER from the off-site survey of Hyettos.</i>	504
13.9	<i>Classification, by functional category, shape, and provenance, of pottery dated ER-MR from the off-site survey of Hyettos.</i>	504
13.10	<i>Classification, by functional category, shape, and provenance, of pottery dated MR, LR and MR-LR from the off-site survey of Hyettos.</i>	505
13.11	<i>Classification, by functional category, shape, and provenance, of pottery dated R-LR from the off-site survey of Hyettos.</i>	505
13.12	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 10 / 14.</i>	507
13.13	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 11 / 12.</i>	508
13.14	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 5.</i>	509
13.15	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 7.</i>	510
13.16	<i>Classification, by function, period, and provenance, of pottery dated R-LR from rural site CN 17.</i>	512
13.17	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 3.</i>	512
13.18	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 6.</i>	514
13.19	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 1.</i>	515
13.20	<i>Classification, by function, period, and provenance, of pottery dated LHELL-LR from rural site CN 2.</i>	515
13.21	<i>An overview of the ceramic data concerning the rural sites discussed in this chapter, specifically CN 10 / 14, CN 5, CN 7, CN 17, CN 3 and CN 6.</i>	517
13.22	<i>Absolute and relative quantities for the provenance-identified pottery from the urban, rural site and off-site surveys.</i>	528
13.23	<i>Absolute and relative quantities of the long-distance imported amphorae and tablewares from the combined urban, rural site and off-site surveys.</i>	529

13.24	<i>HELL–LR Aegean and long-distance imported pottery at Hyettos.</i>	532
13.25	<i>Absolute quantities of, and the ratios between, ARSW and LRC, and ITS and Eastern Sigillata, for the four major Boeotian urban sites surveyed by the project.</i>	533
14.1	<i>Period abbreviations and sub-divisions, with absolute dates for table- and common wares, total numbers of sherds and percentages for each period represented in the surface collection.</i>	538
14.2	<i>The various post-Roman table- and common ware types (and their abbreviations) identified in the district of Hyettos.</i>	540
14.3	<i>English terminology used to refer to different kinds of table- and common ware vessels and their morphological characteristics.</i>	540
14.4	<i>The different kinds of shapes represented at the former ancient city of Hyettos, by ware and by chronological phase.</i>	549
14.5	<i>The different kinds of shapes represented at Site CN 3, by ware and by chronological phase.</i>	554
14.6	<i>The different kinds of shapes represented at Site CN 4, by ware and by chronological phase.</i>	558
14.7	<i>The different kinds of shapes represented at Site CN 8, by ware and by chronological phase.</i>	560
14.8	<i>The different kinds of shapes represented at Site CN 15, by ware and by chronological phase.</i>	562
14.9	<i>The different kinds of shapes represented at Site CN 17, by ware and by chronological phase.</i>	563
14.10	<i>The principal characteristics of common ware fabrics 1–5 (CWF1-5).</i>	567
14.11	<i>The principal characteristics of tableware fabrics 1–5 (TWF1-5).</i>	569
15.1	<i>The demographic and economic development of Vendre.</i>	594
15.2	<i>Population and tax at Lutsi.</i>	595
15.3	<i>Population and taxation at Paolo.</i>	596
16.1	<i>Cultural biography of the rural sites and the city of Hyettos.</i>	600
16.2	<i>Assemblage statistics for the EIA-H finds from the off-site and the rural sites.</i>	630
17.1	<i>Table of size ranges in the Classical Greek polis.</i>	654
